ELECTROLUX Gas Refrigerator

## IT'S PERMANENTLY SILENT because it has no moving parts in its freezing system

Since the Servel Electrolux refrigerator operates on gas, a single burner takes the place of moving, wearing parts . . . a tiny flame circulates the refrigerant, without wear or noise.

These are important advantages in themselves, but equally important are the other results that you get in refrigeration freezing without moving parts...the fact that the low operating or is never increased, that Servel gives you more years of service, and actually can save enough in food alone to pay for itself,

Ask your friends and neighbors who own Servels what they think of gas refrigeration . . . then, before you decide, get all th facts about Servel Electrolux "the gas refrigerator you hear about but never hear!"
